

SeroDetect™

QUALITY CONTROL VALIDATION PANELS

SeroDetect™ Validation Panels are designed to supplement daily internal quality control activities in your laboratory.

BENEFITS:

- Full process controls that are treated like patient specimens.
- Liquid, refrigerator-stable, ready to use, five member panels.
- Levels are targeted to be reactive within the relevant assay range.
- Extended stability allows for long term monitoring of assay performance.
- Use to monitor reagent lot-to-lot variability, inter and intra assay precision, levels of detection, and technician performance.

AVAILABLE PANELS: CATALOG NUMBER:

- | | |
|---------------|----------|
| • HIV-Ab | K-ZMC006 |
| • HBsAg | K-ZMC007 |
| • Anti-HBs | K-ZMC008 |
| • Anti-HBcore | K-ZMC009 |
| • Anti-HCV | K-ZMC010 |
| • HTLV Ab | K-ZMC011 |

FOR RESEARCH USE ONLY
NOT FOR USE IN DIAGNOSTIC PROCEDURES
