GLUTATHIONE REDUCTASE ASSAY KIT

Oxidative stress has been implicated in aging and in the pathogenesis of several disorders. The extent of injury is generally regulated by one or more of the free radical scavenging systems in which the antioxidant enzymes play a major role. Glutathione Reductase (GR) is one such enzyme that is essential for the maintenance of reduced glutathione levels, and is an adjunct in the control of peroxides and free radicals. Glutathione Reductase Assay Kit provides a measure of Glutathione Reductase activity via spectrophotometric means.

- May be automated
- Reproducible results
- User friendly
- Economical

Glutathione Reductase Assay Kit

Catalog No. 0805004
