## **ARYLESTERASE/PARAOXONASE ASSAY**

The Arylesterase/Paraoxonase Assay kit provides a simple, reproducible method of quantifying the activity of serum arylesterase/paraoxonase (PON). This enzyme catalyzes the hydrolysis of organophosphates and aromatic carboxylic acid esters of fatty acids. PON has been shown to be closely associated with HDL, may be a potent inhibitor of LDL oxidation, and may have a peroxidative role due to its active hydrolysis of H<sub>2</sub>O<sub>2</sub>.

Arylesterase/Paraoxonase Assay Kit  
Catalog No. 0801199

- Spectrophotometric
- User friendly
- Reproducible results

872 Main Street, Buffalo, New York 14202

Also available from Zeptomatrix:

TBARS Assay Kit    Catalog No. 0801192

DNA Isolation Kit    Catalog No. 0805001

Total Glutathione Peroxidase Assay Kit    Catalog No. 0805002

Glutathione Reductase Assay Kit    Catalog No. 0805004

Nucleoside Standards    3 versions are available

Dinucleotide Standards    8 versions are available
