C. parvum-S. cerevisiae Recombinant W303-Cpa, titered (1 mL)

PRODUCT DESCRIPTION:

Each frozen aliquot contains 1 mL of a pure, titered culture of a recombinant strain of Saccharomyces cerevisiae. A gene specific to Cryptosporidium parvum was inserted into S. cerevisiae genome using standard recombinant techniques. S. cerevisiae was confirmed by rDNA sequencing. The insert was detected with a specific in-house real-time PCR assay. The purity of the culture was monitored by additional culturing and Gram staining to detect any contaminating bacteria. The titer was performed on one aliquot after freezing. The freezing medium contains 15% glycerol as a cryoprotectant. Please see the Certificate of Analysis for the specific freezing medium used.

INTENDED USE*:

Live, titered microorganisms can be used to determine a limit of detection (LOD), in diagnostic assay development or cross-reactivity studies. When used as a control for nucleic acid tests, the same protocols as those used to amplify clinical specimens should be employed.

*This control is intended to only be used with an assay from Luminex Molecular Diagnostics.

BIOSAFETY:

C. parvum-S. cerevisiae is a biosafety level 1 microorganism and must be used within Biological Safety cabinet. Please consult your institution’s regulations regarding the use of this organism. For a detailed discussion on biological safety see the 5th edition of Biosafety in Microbiological and Biomedical Laboratories (BMBL), published by the CDC at http://www.cdc.gov/biosafety/publications/bmbl5/index.htm.

PRECAUTIONS:

- Use Universal Precautions, this organism is potentially biohazardous.
- Repetitive freezing and thawing is not recommended (aliquot material if necessary). Titer will be altered by a single freeze-thaw.
- To avoid cross-contamination, use separate pipette tips for all reagents.

RECOMMENDED STORAGE:

Titered material should be stored at -65°C or below.

DO NOT USE IN HUMANS. FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES.

These products are intended for research, product development, or quality assurance. These products are NOT intended for use in the manufacture or processing of injectable products subject to licensure under section 351 of the Public Health Service Act or for any other product intended for administration to humans.
